[A] Fixing system  [A]

[B] Plate  [B]

[C] Self-tapping screw  $\varnothing$  3,9 X 32 mm

[D] Anchor in Nylon  $\varnothing$  6 X 30 mm

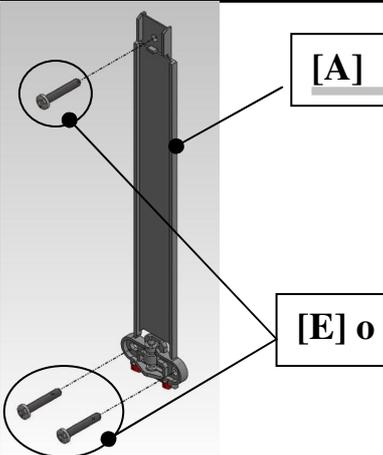

[E] Self-tapping screw  $\varnothing$  3.9 X 16 mm

To be mounted on  
a concrete wall

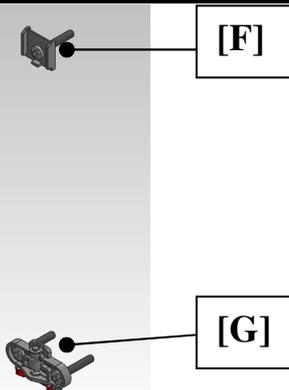

To be mounted on  
a metal wall

### STEP 1

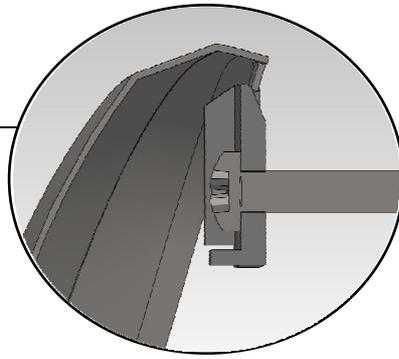

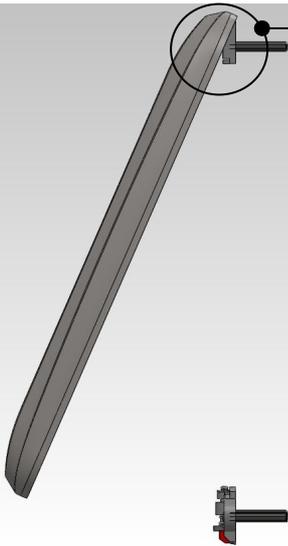

- Position fixing system [A] on the wall
- Fix it in place with the appropriate screw;

### STEP 2

- After fixing the support bracket on the wall, fracture the central part.
- the result is the one illustrated in the figure, now there are a lower support [G] and an upper support [F].

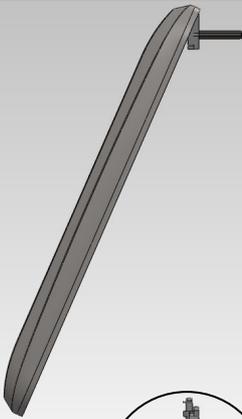

### STEP 3

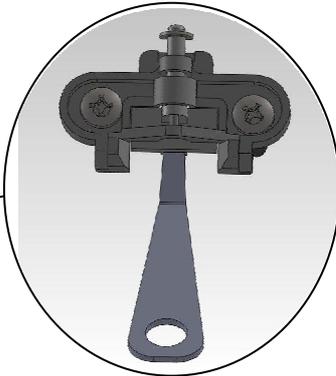

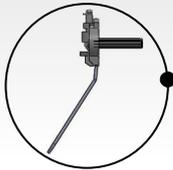

-Position the plate [B] by suspending it on the upper support bracket [F] (already fixed)

- Apply a little downward pressure;

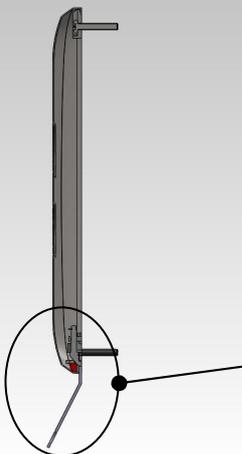

### STEP 4

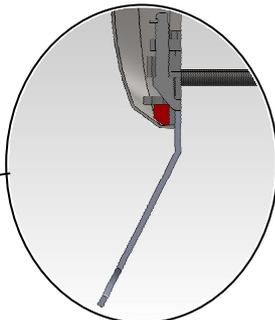

- keep the plate diagonally and placed into the upper support, insert the lever, included in the package, into the lower support [G] as the figure illustrates;

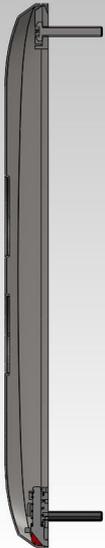

### STEP 5

- Turning down the plate towards the lower support [G] and place it into the wall, leaving leaving the lever inserted, as the figure illustrates;

## STEP 6

-Remove the lever, the plate will fix with the lower support [G];

-in the picture is shown the point to the earth connection;

Point of earth connection
